Premier Tissues (India) Limited
Notes accompanying the financial statements

1 Corporate information

Premier Tissues (India) Limited (the Company) is engaged in the business of manufacturing and selling of tissue papers. The Company has a manufacturing facility near Mysore (Karnataka). It is a wholly owned subsidiary of Rubfila International Limited.

2 Basis of preparation and statement of compliance

The financial statements of the Company have been prepared in accordance with Indian Accounting Standards (Ind AS) notified under the Companies (Indian Accounting Standards) Rules 2015 (as amended). The Balance Sheet, the Statement of Profit and Loss and the Statement of Changes in Equity are prepared and presented in the format prescribed in Division II of Schedule III to the Act, (Ind AS compliant Schedule III), and the Statement of Cash flows have been prepared and presented as per the requirements of Ind AS 7 "Statement of Cash Flows". The disclosure requirements of Balance Sheet, and the Statement of Profit and Loss, as prescribed in Schedule III of the Act, are presented by way of notes forming part of the financial statements along with the other notes required to be disclosed under Ind ASs.

The Financial Statement are presented in INR and all values are rounded off to Rupees Lakhs except share data and per share data unless otherwise stated.

The financial statements have been prepared on historical cost basis except for certain assets and liabilities which are measured at fair value.

Accounting policies have been consistently applied except where a newly issued accounting standard or a revision to the existing standard requires a change in the accounting policy hitherto in use.

Use of estimates

The preparation of financial statements in conformity with Ind AS requires that the management of the Company makes estimates and assumptions that affect the reported amounts of income and expenses of the period, the reported balances of assets and liabilities and the disclosures relating to contingent liabilities as of the date of the financial statements. The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates include useful lives of property, plant and equipment & intangible assets, allowance for doubtful debts/advances, future obligations in respect of retirement benefit plans, expected cost of completion of contracts, provision for rectification costs, fair value measurement etc. Difference, if any, between the actual results and estimates is recognised in the period in which the results are known.

3 Ind AS that has been issued but is not effective as of the closing day of the reporting period

Ministry of Corporate Affairs ("MCA") notifies new standard or amendments to the existing standards under Companies (Indian Accounting Standards) Rules as issued from time to time. On 23 March 2022, MCA amended the Companies (Indian Accounting Standards) Amendment Rules, 2022, applicable from 1 April 2022, as below

(i) Ind AS 103 – Business Combinations

The amendments specify that to qualify for recognition as part of applying the acquisition method, the identifiable assets acquired and liabilities assumed must meet the definitions of assets and liabilities in the Conceptual Framework for Financial Reporting under Indian Accounting Standards (Conceptual Framework) issued by the Institute of Chartered Accountants of India at the acquisition date. These changes do not significantly change the requirements of Ind AS 103. The Company does not expect the amendment to have any impact in its financial statements.

(ii) Ind AS 16 – Property, Plant and Equipment

The amendments mainly prohibit an entity from deducting from the cost of property, plant and equipment amounts received from selling items produced while the company is preparing the asset for its intended use. Instead, an entity will recognise such sales proceeds and related cost in profit or loss. The Company does not expect the amendments to have any impact in its recognition of its property, plant and equipment in its financial statements.

(iii) Ind AS 37 – Provisions, Contingent Liabilities and Contingent Assets

The amendments specify that that the 'cost of fulfilling' a contract comprises the 'costs that relate directly to the contract'. Costs that relate directly to a contract can either be incremental costs of fulfilling that contract (examples would be direct labour, materials) or an allocation of other costs that relate directly to fulfilling contracts. The amendment is essentially a clarification and the Company does not expect the amendment to have any significant impact in its financial statements.

(iv) Ind AS 109 – Financial Instruments

The amendment clarifies the fees which an entity should include when it applies the '10 percent' test of Ind AS 109 in assessing whether to derecognise a financial liability. The Company does not expect the amendment to have any significant impact in its financial statements.

4 Significant accounting policies

(a) Current vs non-current classification of assets and liabilities

All assets and liabilities have been classified as current or non-current as per the Company's normal operating cycle and other criteria set out in the schedule III to the Companies Act, 2013. Based on the nature of products and the time between the acquisition of assets for processing and their realisation in cash and cash equivalent, the Company has ascertained its operating cycle as 12 months for the purpose of current/non-current classification of assets and liabilities

Premier Tissues (India) Limited
Notes accompanying the financial statements

4 Significant accounting policies (Cntd..)

An asset is classified as current when it is:

- (i) Expected to be realised or intended to sold or consumed in normal operating cycle, or
- (ii) Held primarily for the purpose of trading, or
- (iii) Expected to be realised within twelve months after the reporting period, or
- (iv) Cash or cash equivalent unless restricted from being exchanged or used to settle a liability for at least twelve months after the reporting period

All other assets are classified as non-current assets

An liability is classified as current when:

- (i) It is expected to be settled in normal operating cycle, or
- (ii) It is held primarily for the purpose of trading, or
- (iii) It is due to be settled within twelve months after the reporting period or
- (iv) There is no unconditional right to defer the settlement of the liability for at least twelve months after the reporting period.

All other liabilities are classified as non-current liabilities

(b) Fair value measurement

Fair value is the price that would be received to sell an asset or settle a liability in an ordinary transaction between market participants at the measurement date. The fair value of an asset or a liability is measured using the assumption that market participants would use when pricing an asset or liability acting in their best economic interest.

Fair value measurements under Ind AS are categorised as below based on the degree to which the inputs to the fair value measurements are observable and the significance of the inputs to the fair value measurement in its entirety:

- * Level 1 inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities that the Company can access at measurement date
- * Level 2 inputs are inputs, other than quoted prices included in level 1, that are observable for the asset or liability, either directly or indirectly; and
- * Level 3 inputs are unobservable inputs for the valuation of assets or liabilities

(c) Property, plant and equipment (PPE)

PPE is recognized when it is probable that future economic benefits associated with the item will flow to the Company and the cost of the item can be measured reliably. PPE is stated at original cost net of tax/duty credits availed, if any, less accumulated depreciation and cumulative impairment. Cost includes professional fees and, for qualifying assets, borrowing costs capitalized in accordance with the Company's accounting policy.

PPE not ready for the intended use on the date of the Balance Sheet are disclosed as "capital work-in-progress".

Subsequent costs are included in the asset's carrying amount or recognised as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the Company and the cost of the item can be measured reliably. The carrying amount of the replaced part is derecognised. All other repairs and maintenance are charged to the income statement during the financial period in which they are incurred.

Depreciation is recognized using straight-line method so as to write off the cost of the assets (other than freehold land and properties under construction) less their residual values over their useful life determined based on technical evaluation which are different from the useful life specified in Schedule II to the Companies Act, 2013.

The useful life of PPE are as follows

Particulars	Useful life (years)
Factory building	25
Plant and equipment	10-32
Furniture and fixtures	8
Vehicles	5
Office equipment	5
Computers	5

4 Significant accounting policies (Cntd..)

Where cost of a part of the assets ("asset components") is significant to total cost of the asset and useful life of that part is different from the useful life of the remaining asset, useful life of that significant part is determined separately and such asset components is depreciated over its separate useful life.

The gain or loss arising on the disposal or retirement of an item of property, plant and equipment is determined as the difference between the sales proceeds and the carrying amount of the asset and is recognised in the Statement of Profit and Loss on the date of disposal or retirement.

The estimated useful life and residual values are also reviewed at each financial year end and the effect of any change in the estimates of useful life / residual value is accounted on prospective basis.

(d) Intangible assets

Intangible assets are recognized when it is probable that the future economic benefits that are attributable to the asset will flow to the enterprise and the cost of the asset can be measured reliably. Intangible assets are stated at original cost of acquisition less accumulated amortization and accumulated impairment loss.

Intangible assets that are acquired by the Company and having finite useful lives are measured at cost less accumulated amortization and accumulated impairment losses (if any). Costs include expenditure that is directly attributable to the acquisition of the intangible assets.

Subsequent expenditure is capitalized only when it increases the future economic benefits embodied in the specific asset to which it relates. All other expenditure, including expenditure on internally generated goodwill and brands, are recognized in profit or loss as incurred.

Amortization is recognized in profit or loss on a straight-line basis over the estimated useful lives of intangible assets from the date that they are available for use. Expenditure on specialised software are amortised over six years.

(e) Impairment of PPE and Intangible assets

As at each reporting date, the Company reviews the carrying amounts of PPE and intangible assets to determine whether there is an indication that those assets have suffered an impairment loss. If any such indication exists, the PPE and intangible assets are tested for impairment so as to determine the impairment loss, if any. Intangible assets with indefinite life are tested for impairment each year. Company estimates the recoverable amount of the asset and recognizes an impairment loss when the carrying value of an asset exceeds its recoverable amount.

Impairment loss is recognised when the carrying amount of an asset exceeds its recoverable amount. Recoverable amount is determined:

- (i) in case of an individual asset, at the higher of the net selling price and the value in use; and
- (ii) in the case of a cash generating unit (smallest identifiable group of assets that generates independent cash flows), at the higher of the cash generating unit's net selling price and the value in use

(The amount of value in use is determined as the present value of estimated future cash flows from the continuing use of an asset and from its disposal at the end of its useful life. For this purpose, the discount rate (pre-tax) is determined based on the weighted average cost of capital of the company suitably adjusted for risks specified to the estimated cash flows of the asset).

If recoverable amount of an asset (or cash generating unit) is estimated to be less than its carrying amount, such deficit is recognised immediately in the Statement of Profit or Loss as impairment loss and the carrying amount of the asset (or cash generating unit) is reduced to its recoverable amount. For this purpose, the impairment loss recognised in respect of a cash generating unit is allocated to reduce the carrying amount of the assets of the cash generating unit on a pro-rata basis.

When an impairment loss subsequently reverses, the carrying amount of the asset (or cash generating unit), except for allocated goodwill, is increased to the revised estimate of its recoverable amount, but so that the increased carrying amount does not exceed the carrying amount that would have been determined had no impairment loss is recognised for the asset (or cash generating unit) in prior years. A reversal of an impairment loss is recognised immediately in the Statement of Profit or Loss.

4 Significant accounting policies (Cntd..)

(f) Inventories

Inventories are valued as under.

- (i) Raw materials, Stores, Spare Parts, Chemicals: are valued at lower of cost, determined on weighted average cost basis, and net realisable value. However, these items are not written down below cost if the finished products in which they will be incorporated are expected to be sold at or above cost.
- (ii) Work in progress: at cost or net realisable value, whichever is lower. Cost comprises of material cost and related overhead expenses, including labour cost.
- (iii) Finished goods: at cost or net realisable value whichever is lower. Cost comprise material cost and related overhead expenses, including labour cost.
- (iv) Traded goods: at cost, determined on weighted average cost basis, or net realisable value whichever is lower.

Net realisable value is the estimated selling price in the ordinary course of business, less estimated costs of completion and the estimated costs necessary to make the sale.

(g) Foreign currency transaction

The reporting currency of the Company is Indian Rupee, which is also the Company's functional currency.

Foreign currency transactions are recorded on initial recognition in the reporting currency using the exchange rate at the date of the transaction. At each Balance sheet date, foreign currency monetary items are reported using the closing rate. Non monetary items, carried at historical cost denominated in foreign currency are reported using the exchange rate at the date of the transaction. The exchange differences on settlement/ conversion are adjusted in the statement of profit and loss.

(h) Cash and cash equivalents

Cash and cash equivalents in the balance sheet comprise cash on hand and at bank, deposits held at call with banks, other short-term highly liquid investments with original maturities of three months or less that are readily convertible to a known amount of cash and are subject to an insignificant risk of changes in value and are held for the purpose of meeting short-term cash commitments.

(i) Provision, contingent liabilities and contingent asset

(i) Provisions

Provisions are recognised when

- * the Company has a present obligation (legal or constructive) as a result of a past event,
- * it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation; and
- * a reliable estimate can be made of the amount of the obligation.

The amounts recognized as a provision is the best estimate of the expenditure required to settle the present obligation at the end of the reporting period, taking into account the risks and uncertainties surrounding the obligation.

If the effect of the time value of money is material, the amount of provision is discounted to the present value of cashflows estimated to settle the present obligation.. Unwinding of the discount is recognised in the Statement of Profit and Loss as a finance cost. Provisions are reviewed at each balance sheet date and are adjusted to reflect the current best estimate.

Reimbursement expected in respect of expenditure required to settle a provision is recognized only when it is virtually certain that the reimbursement will be received if the Company settles the obligation.

Premier Tissues (India) Limited
Notes accompanying the financial statements

4 Significant accounting policies (Cntd..)

(ii) Contingent liabilities

Contingent liabilities are disclosed in case of

- * A present obligation arising from a past event, when it is not probable that an outflow of resources will be required to settle the obligation; or
- * a present obligation arising from past events, when a reliable estimate of the amount cannot be made.
- * a possible obligation arising from past events where the probability of outflow of resources is not remote.

(iii) Contingent assets

Contingent assets are disclosed where an inflow of economic benefits is probable.

Provisions, contingent liabilities and contingent assets are reviewed at each Balance Sheet date.

(j) Borrowing cost

Borrowing costs consist of interest expense calculated using effective interest method and other costs that the Company incurs in connection with the borrowing of funds.

Borrowing costs that are attributable to the acquisition, construction or production of qualifying assets i.e., assets that necessarily takes a substantial period of time to get ready for its intended use, are capitalized as part of the cost of such assets. Interest income earned on temporary investment of specific borrowings pending their expenditure on qualifying assets are deducted from the cost eligible for capitalization.

All other borrowing costs are expensed in the period in which they are incurred.

(k) Revenue recognition

(i) Sale of goods

Revenue from sale of manufactured and traded goods is recognised when the control of the same is transferred to the customer and it is probable that the Group will collect the consideration to which it is entitled for the exchanged goods. Performance obligations in respect of contracts for sale of manufactured and traded goods is considered as satisfied at a point in time when the control of the same is transferred to the customer.

(ii) Other operating income

Incentives on exports and other Government incentives are recognised when it is probable that the economic benefits associated with the incentives will flow to the entity, the revenue can be measured reliably and there is no significant uncertainty about the ultimate realization of the incentive.

(iii) Other income

- * Interest income

Interest income is recognised on a time proportion basis using the effective interest method.

(l) Employee benefits

(i) Short term employee benefits

Employee benefits such as salaries, wages, bonus, short-term compensated absences, performance incentives, etc., falling due wholly within the twelve months of rendering service are classified as short term employee benefit and are expensed in the period in which the employee renders the related service.

(ii) Defined benefit plans

The Company's obligation towards gratuity is a defined benefit plan. The present value of the obligation under such defined benefit plan is determined based on actuarial valuation, done by a qualified actuary, using the Projected Unit Credit Method, which recognizes each period of service as giving rise to additional unit of employee benefit entitlement and measures each unit separately to build up the final obligation.

The obligation is measured at the present value of the estimated future cash flows. The discount rate used for determining the present value of the obligation under defined benefit plans is based on the market yields on Government securities, having maturity periods approximating to the terms of related obligations as at the Balance Sheet date.

Premier Tissues (India) Limited
Notes accompanying the financial statements

4 Significant accounting policies (Cntd..)

Defined benefit cost comprising current service cost, past service cost and gains or loss on settlements are recognized in statement of profit or loss as employee benefit expenses. Interest cost implicit in defined benefit cost is recognized in statement of profit or loss under finance cost. Gains or losses on the curtailment or settlement of the defined benefit plan are recognized when the curtailment or settlement occurs.

Remeasurements, comprising actuarial gains and losses, the effect of the changes to the asset ceiling (if applicable) and the return on plan assets (excluding net interest as defined above), are recognized in other comprehensive income.

(iii) Long term employee benefits

The obligation recognized in respect of long term employee benefits such as long term compensated absences is measured at present value of estimated future cash flows expected to be made by the Company and is measured in a similar manner as in the case of defined benefit plan.

Long term employee benefit costs comprising current service cost and gains or losses on curtailments and settlements, remeasurements including actuarial gains and losses are recognized in the statement of profit or loss as employee benefits expense. Interest cost implicit in long term employee benefit cost is recognized in the statement of profit or loss under finance cost.

(iv) Post employment benefit - defined contribution plan

The Company's contributions to defined contribution plans are recognized in statement of profit or loss in the period to which the employee provide the related service.

(v) Termination benefits

Termination benefits are recognized as expense in the period in which they are incurred.

(m) Leases

IND AS 116, defines a lease term as the non cancellable period for which the lessee has the right to use an underlying asset including optional periods, when an entity is reasonably certain to exercise an option to extend (or not to terminate) a lease. The Company considers all relevant facts and circumstances that create an economic incentive for the lessee to exercise the option when determining the lease term. The option to extend the lease term is included in the lease term, if it is reasonably certain that the lessee would exercise the option. The Company reassesses the option when significant events or changes in circumstances occur that are within the control of the lessee

The Company evaluates each contract or arrangement, whether it qualifies as lease as defined under Ind AS 116

(i) As a lessee

The Company recognises a right-of-use asset and a lease liability at the lease commencement date. The right of use asset is initially measured at cost, which comprises the initial amount of the lease liability adjusted for any lease payments made at or before the commencement date, plus any initial direct cost incurred and an estimate of cost to dismantle and remove the underlying asset or to restore the underlying asset or the site on which it is located, less any lease incentives received.

The right-of-use asset is subsequently depreciated using the straight line method from the commencement date to the earlier of the end of the useful life or the end of the lease term. The estimated useful life of the right-of-use assets are determined on the same basis as those of property, plant and equipment. In addition, the right-of-use asset is periodically reduced by impairment losses, if any, and adjusted for certain remeasurements of the lease liability.

4 Significant accounting policies (Cntd..)

The lease liability is initially measured at the present value of the lease payments that are not paid at the commencement date, discounted using the interest rate implicit in the lease or, if that rate cannot be readily determined, the Company's incremental borrowing rate. The lease payments shall include fixed payments, variable lease payments, residual value guarantees, exercise price of a purchase option where the Company is reasonably certain to exercise that option and payment of penalties for terminating the lease, if the lease term reflects the lessee exercising an option to terminate the lease. Subsequent to initial measurement, the liability will be reduced for payments made and increased for interest. It is remeasured to reflect any reassessment or modification, or if there are changes in in-substance fixed payments. When the lease liability is remeasured, the corresponding adjustment is reflected in the right-of-use asset, or profit and loss if the right-of-use asset is already reduced to zero.

The Company has elected not to apply the requirements of Ind AS 116 to short-term leases of all assets that have a lease term of 12 months or less and leases for which the underlying asset is of low value. The lease expenses associated with these leases are recognized in the statement of profit and loss on a straight line basis.

(ii) As a lessor

Lease income from operating leases, where the Company is a lessor, is recognised in income on a straight-line basis over the lease term unless the receipts are structured to increase in line with expected general inflation to compensate for the expected inflation.

(n) Income taxes

(i) Income tax expense

Income tax expense comprises current and deferred tax. It is recognised in statement of profit and loss except when they relate to items recognized in other comprehensive income or directly in equity, in which case, the income tax expense is also recognized in other comprehensive income or directly in equity, as the case may be.

(ii) Current tax

Tax on income for the current period is determined on the basis of taxable income (or on the basis of book profits wherever minimum alternate tax is applicable) and tax credits computed in accordance with the provisions of the Income Tax Act 1961. Management periodically evaluates positions taken in the tax returns with respect to situations in which applicable tax regulations are subject to interpretation and establishes provisions where appropriate.

Current tax assets and liabilities are offset only if, the Company has a legally enforceable right to set off the recognised amounts; and intends either to settle on a net basis, or to realise the asset and settle the liability simultaneously.

(iii) Deferred tax

Deferred tax is recognized on temporary differences between the carrying amounts of assets and liabilities in the Company's financial statements and the corresponding tax bases used in computation of taxable profit.

Deferred tax liabilities are recognized for all taxable temporary differences.

Deferred tax assets are recognized for all deductible temporary differences to the extent that it is probable that taxable profit will be available against which the deductible temporary differences can be utilized. Deferred tax assets are recognized for the carry forward and unused tax credits and any unused tax losses only to the extent that the entity has sufficient taxable temporary differences or convincing other evidence that sufficient taxable profit will be available against which the unused tax losses or unused tax credits can be utilised.

The carrying amount of deferred tax assets is reviewed at each reporting date and reduced to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the deferred tax asset to be utilized.

Deferred tax assets and liabilities are offset only if entity has a legally enforceable right to set off current tax assets against current tax liabilities; and deferred tax assets and the deferred tax liabilities relate to the income taxes levied by the same taxation authority.

Premier Tissues (India) Limited
Notes accompanying the financial statements

4 Significant accounting policies (Cntd..)

(o) Earnings per share

Basic earnings per share is computed by dividing the net profit for the year attributable to the shareholders' by weighted average number of equity shares outstanding during the year.

Diluted earnings per share is computed by dividing the net profit for the year attributable to the shareholder' by the weighted average number of equity shares considered for deriving basic earnings per share and also the weighted average number of equity shares that could have been issued upon conversion of all dilutive potential equity shares.

(p) Financial instruments

Financial assets and financial liabilities are recognized when Company becomes a party to the contractual provisions of the instruments.

Financial assets and financial liabilities are initially measured at fair value. Transaction costs that are directly attributable to the acquisition or issue of financial assets and financial liabilities (other than financial assets and financial liabilities at fair value through profit or loss) are added to or deducted from the fair value of the financial assets or financial liabilities, as appropriate, on initial recognition. Transaction costs directly attributable to the acquisition of financial assets or financial liabilities at fair value through profit or loss are recognized immediately in the Statement of Profit or Loss.

(i) Financial assets

All financial assets are subsequently measured at either amortized cost or fair value, depending on the classification of the financial assets.

1) Financial assets at amortized cost

Financial assets are subsequently measured at amortized cost using the effective interest method if these financial assets are held within a business whose objective is to hold these assets in order to collect contractual cash flows and the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

2) Financial assets at fair value through other comprehensive income

Financial assets are measured at fair value through other comprehensive income if these financial assets are held within a business whose objective is achieved by both collecting contractual cash flows and selling financial assets and the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

3) Financial assets at fair value through profit or loss

Financial assets are measured at fair value through profit or loss unless it is measured at amortized cost or at fair value through other comprehensive income on initial recognition.

Derecognition of Financial Asset

The Company derecognises a financial asset when the contractual rights to the cash flows from the asset expire, or when it transfers the financial asset and substantially all the risks and rewards of ownership of the asset to another party.

Impairment of financial assets

The Company assesses at each balance sheet date whether a financial asset or a group of financial assets is impaired. Ind AS 109 requires expected credit losses to be measured through a loss allowance. The Company recognises lifetime expected losses for trade receivables that do not constitute a financing transaction. For all other financial assets, expected credit losses are measured at an amount equal to 12 month expected credit.

4 Significant accounting policies (Cntd..)

For the purpose of measuring expected credit loss allowance for trade receivables, the Company uses a provision matrix / model to determine the impairment loss allowance on the portfolio of trade receivables. The provision matrix is based on its historical credit risk characteristics such as default and delay rates over the expected life of the trade receivables and is adjusted for forward looking information considering the type of customers and a judgemental evaluation of the collectability of the receivables as permitted under Ind AS 109 'Financial Instruments'. The matrix has been developed based on the past data after considering the level of provisioning which has been carried in books against the age-wise profile of the trade receivables after they have become past due and the expected delays in the payment as is evident from the age-wise profile of trade receivables.

At every reporting date, the historical observed default and delay rates are updated and changes in the forward-looking estimates are reviewed.

(ii) Financial liabilities

All financial liabilities are measured at amortized cost using the effective interest method or at fair value through profit or loss.

1) Financial liabilities at fair value through profit or loss (FVTPL)

Financial liabilities are classified as at FVTPL when the financial liability is held for trading or it is designated as at FVTPL. A financial liability is classified as held for trading if it has been incurred principally for the purpose of repurchasing it in the near term; or on initial recognition it is part of a portfolio of identified financial instruments that the Company manages together and has a recent actual pattern of short-term profit-taking; or it is a derivative that is not designated and effective as a hedging instrument.

A financial liability other than a financial liability held for trading may be designated as at FVTPL upon initial recognition, if such designation eliminates or significantly reduces a measurement or recognition inconsistency that would otherwise arise, or the financial liability forms part of a group of financial assets or financial liabilities or both, which is managed and its performance is evaluated on a fair value basis, in accordance with the Company's documented risk management or investment strategy, and information about the grouping provided internally on that basis; or it forms part of a contract containing one or more embedded derivatives, and Ind AS 109 permits the entire combined contract to be designated as at FVTPL in accordance with Ind AS 109.

Financial liabilities at FVTPL are stated at fair value, with any gains or losses arising on remeasurements recognized in profit or loss.

2) Financial liability subsequently measured at amortized cost

Financial liabilities that are not held-for-trading and are not designated as at FVTPL are measured at amortized cost at the end of subsequent accounting periods. The carrying amounts of financial liabilities that are subsequently measured at amortized cost are determined based on the effective interest method.

Derecognition of financial liability

The Company derecognizes financial liabilities when, and only when, the Company's obligations are discharged, cancelled or have expired. The difference between the carrying amount of the financial liability derecognized and the consideration paid and payable is recognized in the Statement of Profit and Loss.

(q) Segment reporting

Operating segments are reported in a manner consistent with the internal reporting provided to the chief operating decision maker.

The following specific accounting policies have been followed for segment reporting.

- (i) Segment revenue includes revenue from operations and other income directly identifiable with / allocable to the segment including inter-segment revenue.
- (ii) Expenses that are directly identifiable with / allocable to segments are considered for determining the segment result. The expenses, which relate to the Company as a whole and not allocable to segments, are included under "Unallocable corporate expenditure".
- (iii) Income that relates to the Company as a whole and not allocable to segments is included in "Unallocable corporate income".
- (iv) Segment result includes margins on inter-segment sales which are reduced in arriving at the profit before taxes of the Company.

* Working Capital = Current Assets - Current Liabilities

** Tangible networth = Total assets - Total liabilities - Intangible assets (or) Total equity - Intangible assets.

*** Inter corporate deposits given to other entities have been considered under treasury investments.

34 The Company did not have any transaction during the year with Companies struck off under section 248 of the Companies Act, 2013 or section 560 of Companies Act, 1956

35 The Company has not advanced to, or loaned to, or invested in (either from borrowed funds or any other sources or kind of funds) any other person or entity, including foreign entity ("Intermediaries"), with the understanding, whether recorded in writing or otherwise, that the intermediary shall, whether, directly or indirectly lend or invest in other persons or entities identified in any manner whatsoever by or on behalf of the Company ("Ultimate Beneficiaries") or provide any guarantee, security or the like on behalf of the Ultimate Beneficiaries,

36 The Company has not received any fund from any person or entity, including foreign entity ("Funding Parties"), with the understanding, whether recorded in writing or otherwise, that the Company shall, whether, directly or indirectly, lend or invest in other persons or entities identified in any manner whatsoever by or on behalf of the Funding Party ("Ultimate Beneficiaries") or provide any guarantee, security or the like on behalf of the Ultimate Beneficiaries,

Premier Tissues (India) Limited
Notes accompanying the financial statements

37 Financial Instruments

a) Capital risk management

The Company manages its capital to ensure that Company will be able to continue as a going concern while maximising the return to stakeholders through the optimisation of the debt and equity balances.

The Company manages its capital structure and makes adjustments in light of changes in economic conditions and the requirement of the financial covenants. The funding requirement is met through a mixture of equity and internal accrual. The Company does not have any borrowings as at 31 March 2022 and as at 31 March 2021.

c) Financial risk management

The operations of the Company are subject to a variety of financial risks, including market risk, credit risk, and liquidity risk. The Company has formulated a financial risk management framework whose principal objective is to minimise the Company's exposure to risks and/or costs associated with the financing, investing and operating activities of the Company.

(i) Market risk

Market risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in market prices. Market prices comprise three types of risk: currency rate risk, interest rate risk and other price risks, such as equity price risk and commodity risk. Financial instruments affected by market risk include loans and borrowings, deposits, investments, and derivative financial instruments.

Premier Tissues (India) Limited
Notes accompanying the financial statements

37 Financial Instruments (Cntd..)

c) Financial risk management (Cntd..)

i) Market risk (Cntd..)

a) Interest rate risk and sensitivity

The exposure to the risk of changes in market interest rates relates primarily to long term debt. Borrowings issued at variable rates expose the Company to cash flow interest rate risk. The Company does not have any borrowings and accordingly there is no exposure to interest rate risk.

b) Foreign currency risk and sensitivity

The Company transacts business primarily in Indian Rupees. However, the Company imports certain materials which exposes the company to foreign currency risk. The Company does not hedge its foreign currency exposure. The carrying amount of the Company's foreign currency denominated monetary assets and liabilities at the end of the reporting period are as follows.

		₹ Lakhs	
Foreign currency		As at 31 March 2022	As at 31 March 2021
Monetary liabilities			
United States Dollars (USD)	\$	39.25	17.23

For the year ended 31 March 2021			
United States Dollars	\$	+50	(0.86)
		-50	0.86
Euros	€	+50	-
		-50	-

c) Commodity price risk and sensitivity

The Company is exposed to the movement in price of key raw materials in domestic and international markets. The Company has in place policies to manage exposure to fluctuations in the prices of the key raw materials used in operations. The Company enter into contracts for procurement of material, most of the transactions are short term fixed price contract and a few transactions are long term fixed price contracts. The management considers that the Company's exposure to price risk are insignificant and hence sensitivity analysis is not disclosed.

37 Financial Instruments (Cntd..)

c) Financial risk management (Cntd..)

ii) Credit risk

Credit risk arises from the possibility that counterparty may not be able to settle their obligation as agreed.

Banks and other financial institutions: The Company considers factors such as track record, size of the institution, market reputation and service standards to select the banks with which balances and deposits are maintained. The Company does not maintain significant cash and deposit balances other than those required for its day to day operations.

Other financial assets: The Company extends credit to customers in normal course of business based on careful evaluation of the the customer's financial condition and credit history. Further the Company periodically assesses the financial reliability of customers, taking into account the financial condition, current economic trends, and analysis of historical bad debts and ageing of accounts receivable. The company does not hold any collateral on the balance outstanding. The ageing of trade receivables is as below:

Particulars	₹ Lakhs	
	As at 31 March 2022	As at 31 March 2021
Upto 6 months past due (including amount not due)	234.14	263.83
6 - 12 months past due	1.24	2.78
Above 12 months past due	8.61	14.07
	243.99	280.68
Provision for expected credit loss and bad and doubtful debts	(5.09)	(2.42)
Total	238.90	278.26

Provision for expected credit loss

The Company has used a practical expedient methodology by computing the expected credit loss allowance for trade receivables based on a provision matrix (ECL Model). The provision matrix takes into account historical credit loss experience and adjusted for forward looking information. The movement in provision for expected credit loss is as follows

Particulars	₹ Lakhs	
	As at 31 March 2022	As at 31 March 2021
Provision as at the beginning of the year	102.42	0.55
(a) Allowance based on ECL model (net of reversals)	(0.66)	100.30
(b) Additional provision (net of reversals)	8.50	1.57
(c) Bad debts written off	(5.18)	-
Provision as at the end of the year	105.08	102.42

Premier Tissues (India) Limited
Notes accompanying the financial statements

37 Financial Instruments (Cntd..)

c) Financial risk management (Cntd..)

(iii) Liquidity risk

Liquidity risk is that risk that the Company may not be able to meet its present and future cash and collateral obligations without incurring unacceptable losses. The Company relies on a mix of capital infusion and excess operating cash flows to meet its needs for funds. The Company monitors rolling forecasts of its liquidity requirements to ensure it has sufficient cash to meet operational need.

b) Fair value of financial liabilities measured at amortized cost

₹ Lakhs

Particulars	Note	As at 31 March 2022		As at 31 March 2021	
		Carrying amount	Fair value	Carrying amount	Fair value
Trade payables	22	483.36	483.36	404.29	404.29
Lease Liabilities	18	54.67	54.67	64.37	64.37
Other financial liabilities	19	167.71	167.71	142.45	142.45
Total		705.74	705.74	611.11	611.11

c) Fair valuation technique and hierarchy

The Company maintains policies and procedures to value financial assets and financial liabilities using the best and most relevant data available. The fair values of the financial assets and liabilities are included at the amount that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date.

- i) Level 1 hierarchy includes financial instruments measured using quoted prices (unadjusted) in active markets for identical assets or liabilities that the entity can access at the measurement date.
- ii) The fair value of financial instruments that are not traded in an active market is determined using valuation techniques which maximize the use of observable market data and rely as little as possible on entity-specific estimates. If all significant inputs required to fair value an instrument are observable, the instrument is included in Level 2.
- iii) If one or more of the significant inputs is not based on observable market data, the instrument is included in Level 3. This is the case for unlisted equity securities, contingent consideration and indemnification asset included in Level 3.

Other assumptions used in the estimation of fair values:

- i) The fair value of trade receivables, cash and cash equivalents, other bank balances and other current financial assets approximate their carrying amount due to the short-term nature of these instruments.
- ii) The fair value of trade payables and other current financial liabilities approximate their carrying amount due to the short-term nature of these instruments.

39 Disclosure pursuant to Indian Accounting Standard (Ind AS) 12 "Income taxes"

a) Major components of income tax expenses

₹ Lakhs

a) The tax rate applicable for the financial year 2021-22 is 27.82%, keeping the base rate at 25% increased with the surcharge and health and education cess, as applicable.

40 Disclosure pursuant to Indian Accounting Standard (Ind AS) 19 "Employee Benefits"

a) Defined contribution plans

The Company's contribution to employee provident fund is the defined contribution plan. Amounts recognized as expense and included in the "employee benefits expense" [Note 29] in the statement of profit or loss is as follows:

		₹ Lakhs	
Sl. No.	Particulars	2021-22	2020-21
(i)	Provident Fund	34.40	32.49

b) Defined benefit plans

i) Nature of the benefit

The Company provides for gratuity, a defined benefit plan, covering eligible employees. This plan provides for a lump sum payment, to vested employees on retirement, death, incapacity or termination of employment, of amounts that are based on salary and tenure of employment. Liability with regard to gratuity is determined by actuarial valuation and the provision for gratuity as at the reporting date has been made as per actuarial valuation report.

ii) Amounts recognized in Balance Sheet

Particulars	₹ Lakhs	
	As at 31 March 2022	As at 31 March 2021
Present value of defined benefit obligation (wholly funded)	107.81	101.95

Premier Tissues (India) Limited
Notes accompanying the financial statements

40 Disclosure pursuant to Indian Accounting Standard (Ind AS) 19 “Employee Benefits” (Cntd..)

b) Defined benefit plans (Cntd..)

vii) The expected contribution for the next financial year is ₹ 11.52 lakhs.

viii) The principal actuarial assumptions used for estimating the Company's defined benefit

Sl. No.	Particulars	Gratuity	
		As at 31 March 2022	As at 31 March 2021
1	Weighted average duration of DBO (in years)	13.47	13.86
2	Discount rate	7.48%	7.04%
3	Expected return on assets	7.04%	7.04%
4	Expected rate of increase in salary	7.55%	7.55%
5	Attrition rate	7.00%	7.00%
6	Mortality rate	Published rates under the Indian Assured Lives Mortality (2012-14) Ultimate table	

The assumption of future salary increase takes into account the inflation, seniority, promotion and other relevant factors such as supply and demand in employment market.

ix) Sensitivity analysis

Significant actuarial assumptions for the determination of the defined benefit obligation are discount rate, expected salary increase and maturity. The sensitivity analysis given below highlights the impact of change in these significant actuarial valuation assumptions on the defined obligation of Gratuity plan.

Particulars	Change in assumption	Gratuity	
		As at 31 March 2022	As at 31 March 2021
Discount rate	1%	95.84	90.40
Discount rate	-1%	122.18	115.91
Salary growth rate	1%	121.72	115.41
Salary growth rate	-1%	96.04	90.63
Attrition rate	1%	106.97	100.72
Attrition rate	-1%	108.80	103.43

The above sensitivity analysis is based on a change in an assumption while holding all other assumptions constant. In practice, this is unlikely to occur, and changes in some of the assumptions may be correlated. When calculating the sensitivity of the defined benefit obligation to significant actuarial assumptions the same method (projected unit credit method) has been applied as when calculating the defined benefit obligation recognised within the Balance Sheet.

x) Maturity profile of defined benefit obligation (weighted average)

Particulars	Gratuity	
	As at 31 March 2022	As at 31 March 2021
Expected cash flows (undiscounted) over the next		
- 1 year	6.74	6.03
- 2 - 5 years	25.34	24.44
- 5 - 10 years	35.95	33.19
- beyond 10 years	267.78	239.14

40 Disclosure pursuant to Indian Accounting Standard (Ind AS) 19 “Employee Benefits” (Cntd..)

b) Defined benefit plans (Cntd..)

x) Major risks to the plan

1) Interest rate risk

The defined benefit obligation calculated uses a discount rate based on government bonds. If bond yields fall, the defined benefit obligation will tend to increase.

2) Salary inflation risk

Higher than expected increases in salary will increase the defined benefit obligation.

3) Retirement age

It should be noted that in case of employees above retirement age, for the purpose of valuation it is assumed they will retire immediately & benefit is considered up to actual retirement age.

4) Demographic risk

This is the risk of volatility of results due to unexpected nature of decrements that include mortality attrition, disability and retirement. The effects of this decrement on the DBO depend upon the combination salary increase, discount rate, and vesting criteria and therefore not very straight forward. It is important not to overstate withdrawal rate because the cost of retirement benefit of a short caring employees will be less compared to long service employees.

5) Asset liability mismatch

This will come into play unless the funds are invested with a term of the assets replicating the term of the liability.

6) Actuarial risk

It is the risk that benefits will cost more than expected. This can arise due to one of the following reasons.

- Adverse Salary Growth Experience: Salary hikes that are higher than the assumed salary escalation will result into an increase in Obligation at a rate that is higher than expected.
- Variability in mortality rates: If actual mortality rates are higher than assumed mortality rate assumption than the Gratuity benefits will be paid earlier than expected. Since there is no condition of vesting on the death benefit, the acceleration of cash flow will lead to an actuarial loss or gain depending on the relative values of the assumed salary growth and discount rate.
- Variability in withdrawal rates: If actual withdrawal rates are higher than assumed withdrawal rate assumption than the Gratuity benefits will be paid earlier than expected. The impact of this will depend on whether the benefits are vested as at the resignation date

7) Investment risk

For funded plans that rely on insurers for managing the assets, the value of assets certified by the insurer may not be the fair value of instruments backing the liability. In such cases, the present value of the assets is independent of the future discount rate. This can result in wide fluctuations in the net liability or the funded status if there are significant changes in the discount rate during the inter-valuation period.

8) Liquidity risk

Employees with high salaries and long durations or those higher in hierarchy, accumulate significant level of benefits. If some of such employees resign / retire from the company there can be strain on the cash flows.

9) Market risk

Market risk is a collective term for risks that are related to the changes and fluctuations of the financial markets. One actuarial assumption that has a material effect is the discount rate. The discount rate reflects the time value of money. An increase in discount rate leads to decrease in Defined Benefit Obligation of the plan benefits & vice versa. This assumption depends on the yields on the corporate / government bonds and hence the valuation of liability is exposed to fluctuations in the yields as at the valuation date.

10) Legislative risk / regulative risk

Legislative risk is the risk of increase in the plan liabilities or reduction in the plan assets due to change in the legislation / regulation. The government may amend the Payment of Gratuity Act thus requiring the companies to pay higher benefits to the employees. This will directly affect the present value of the Defined Benefit Obligation and the same will have to be recognized immediately in the year when any such amendment is effective.
